

Personal Portfolio

For 2026 Red Bird Challenge Camp

Applicant: Kunqi Lin (KUNKI)
Economics · AI Products · Workflow Design

SCI Q2 second author

AI competition project

Creator brand + tools

OPC + AI FDE direction

THEME · HUMAN-AI SYMBIOSIS

Designing with AI as a **second self**, not just a tool.

This portfolio presents five evidence-backed projects: research rigor, international AI competition, shipped products, creator practice, and an OPC-oriented AI workflow.

Research

SCI Q2 paper with quantitative evidence.

Competition

APICTA Brunei 2nd Runner-up.

Product

Mini-program launch and AI workflow practice.

Future

AI FDE and one-person company practice.

Kunqi Lin

KUNKI · Economics student
AI product builder / creator / researcher
kunkiporfolio.site

GPA 3.98 / 4.0, ranked 1 / 227 in major.

SCI SCI Q2 publication; first student author, second author overall.

AI Products, content, workflow, and OPC exploration.

I turn economic questions and AI tools into things people can actually use.

My strongest edge is not a single label. It is the ability to move between research, product, public communication, and workflow design, then turn that movement into visible outputs.

3.98

GPA / 4.0, ranked first in International Economics and Trade.

IF 4.4

SCI Q2 journal evidence from Energy for Sustainable Development.

APICTA

Brunei 2024 international ICT award evidence.

5,000+

AI content audience and user-facing workflow practice.

Red Bird fit: I study AI as a new relationship, not only a new tool.

Research gives me rigor. Products give me feedback loops. Content entrepreneurship gives me audience sensitivity. OPC practice gives me a live field for human-AI collaboration.

Researcher

Frame variables, read systems, test evidence.

Builder

Ship small products and let users correct the idea.

Creator

Translate AI workflows into public-facing content.

Selected evidence for this portfolio: SCI paper, APICTA project, AI brand, campus product, OPC direction.

One throughline: human value is amplified when a person can ask better questions, judge outputs, organize workflows, and build with AI.

SCI Q2 Publication · Energy Economics

Published SCI paper on critical minerals and NEV industry development.

Article: How trading patterns of critical minerals affects the NEV industry? A complex network and multiple regression analysis approach.

Role: First student author · Second author overall

Journal: Energy for Sustainable Development, Vol. 85, 2025, Article 101655

IF 4.4

Impact factor evidence for the journal.

SCI Q2

Published journal ranking signal.

1st

First student author; second author overall.

DOI · 10.1016/j.esd.2025.101655

Published Evidence + Method

Regression + Mediation Evidence

Variable	NEVD	NEVT	Sobel z
Weighted in-degree	0.144***	0.019**	4.174
Weighted out-degree	0.278***	0.031***	3.677
Weighted degree	0.395***	0.050***	4.235
EGC	0.547	0.525***	2.325

Finding

Trade network centrality significantly promotes NEV industry growth, with technological progress as a full mediator.

Qianwen · Low-Resource Language Assessment

Turning a team outcome into a defensible product story.

Project: “Qianwen”, a multimodal AI system for low-resource language learning and assessment.

Competition evidence: APICTA Awards 2024 in Brunei, 2nd Runner-up in Tertiary Student Projects: Solutions, with Foreign Ministry and school media coverage.

My ownership path: reconstructed the project logic from code, paper, proposal, and pitch deck, then rebuilt the product narrative, demo explanation, and commercialization story.

APICTA

Asia Pacific ICT Alliance Awards 2024

2nd

Runner-up, Tertiary Student Projects

Brunei

International presentation and award scene

Media

Foreign Ministry and school recognition

Product framing: from “AI can generate questions” to reliable low-resource language assessment.

Evidence framing: connect product demo, certificate, award scene, and official recognition into one defensible story.

PERSONAL WEBSITE

Hey, 我是 Kunki

一个普通文科生, 正在用 AI 把大学内外的每一步都走得更有意义

开始阅读 我的服务

我主要记录四件事:
大学结果 · AI工具 · 一人公司实践 · 成长实验

来自广东外语外贸大学, 学国际经济与贸易。没有技术背景, 也没有很硬的资源, 很多事都是一边试, 一边改, 一边把结果慢慢做出来。
大学这几年, 我比较认真地做过几件事: 把课内学习做扎实, 也把 AI、内容、私域和一人公司当成真实实验场。搞定 rank1, SCI 论文、国家奖学金、保研准备这些结果, 对我来说更像是一致性被验证过的痕迹。
这个网站不是用来炫耀成绩厉害的人, 而是把我正在做的事, 踩过的坑, 验证过的方法放在这里, 如果你也想把大学、AI 和个人成长走得更清楚一点, 欢迎来逛逛, 也欢迎找我交流。

Campus Product Launch: “ChiSha!” Mini-Program

饭点不纠结, 一抽就知道吃啥!

吃啥-抽卡订餐

吃啥 · 喝啥 · DIY饭单, 一站式随机决策小帮手

喝啥

帮你选奶茶和咖啡

喝点什么

奶茶不泡茶

选择饮品店

吃啥

食堂吃什么 / 外卖点什么都能抽

就这家了吧!

再抽一次+

DIY饭单

收藏喜欢的店铺, 创建自己的饭单, 一键抽取更方便

Small product, real launch.

- Helps students decide what to eat or drink through quick random draws.
- Includes food, beverage, and DIY menu scenarios.
- Reached 500+ users and 3,000+ opens on day one.
- Built a 147-member user feedback community.

500+

Users on launch day

3,000+

Opens on day one

147

Feedback group members

English poster message

“Stuck at mealtime? One draw decides what to eat.” The Chinese launch poster is used as product evidence before the final English visual translation.

我是林kunki

OPC offline salon · AI exploration after Gaokao

Joining the Guangzhou OPC circle.

OPC is not just “working alone”. I hope to become part of the Guangzhou OPC community, using AI agents, knowledge bases, content distribution, and collaboration networks to carry a larger business surface.

People
Creators, students, operators, service providers.

Workflow
Knowledge base, agent collaboration, delivery.

Market
From consumer-facing enablement to enterprise AI projects.

Human-AI Symbiosis · Into the Unknown

From consumer-facing AI enablement to enterprise workflow transformation.

At present, I help individual users build a personal digital brain and second-self workflow with Obsidian knowledge bases, Claude Code, Codex, and local agent collaboration.

The longer-term direction is AI FDE and enterprise process redesign: mapping workflows, embedding agents, and turning AI from a tool into an operating system.

Tools
Claude Code, Codex, Obsidian, local agents.

Users
Learners, creators, and knowledge workers.

Method
Capture knowledge, orchestrate agents, redesign processes.

Next Step
Enterprise AI enablement when project access matures.

Human value is not replaced by AI; it is redefined by the ability to ask, judge, organize, and build with AI.

Why Red Bird: I want to study not only what AI can do, but how AI changes incentives, workflows, communities, and value creation.
